

Farbe. Form. Vollendung.

Vielfalt in Edelstahl Rostfrei

Architektur mit Edelstahl Rostfrei

Architecture with Stainless Steel

Moderne und anspruchsvolle Architektur erkennt man an zeitloser Form und der Verwendung hochwertiger Materialien.

Edelstahl Rostfrei und Edelstahl Rostfrei gefärbt nach dem **INOX-SPECTRAL®-Verfahren** hat alle Qualitäten, die moderne Architektur braucht: Funktion, Wirtschaftlichkeit und Ästhetik.

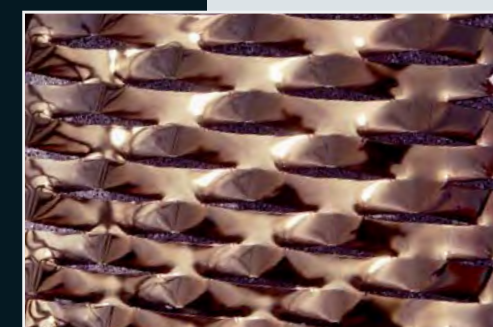

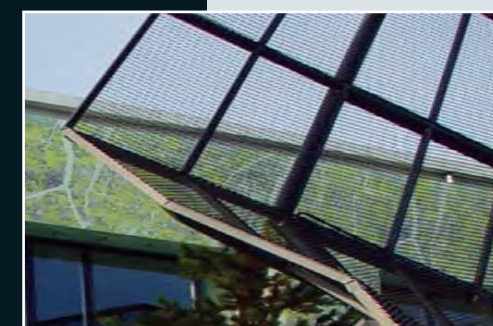

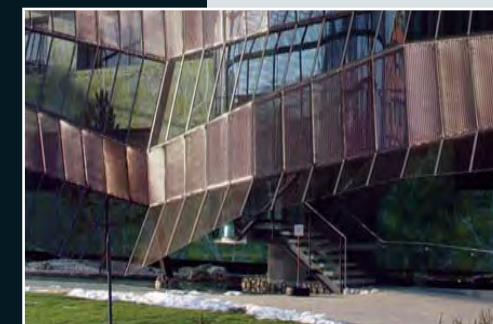

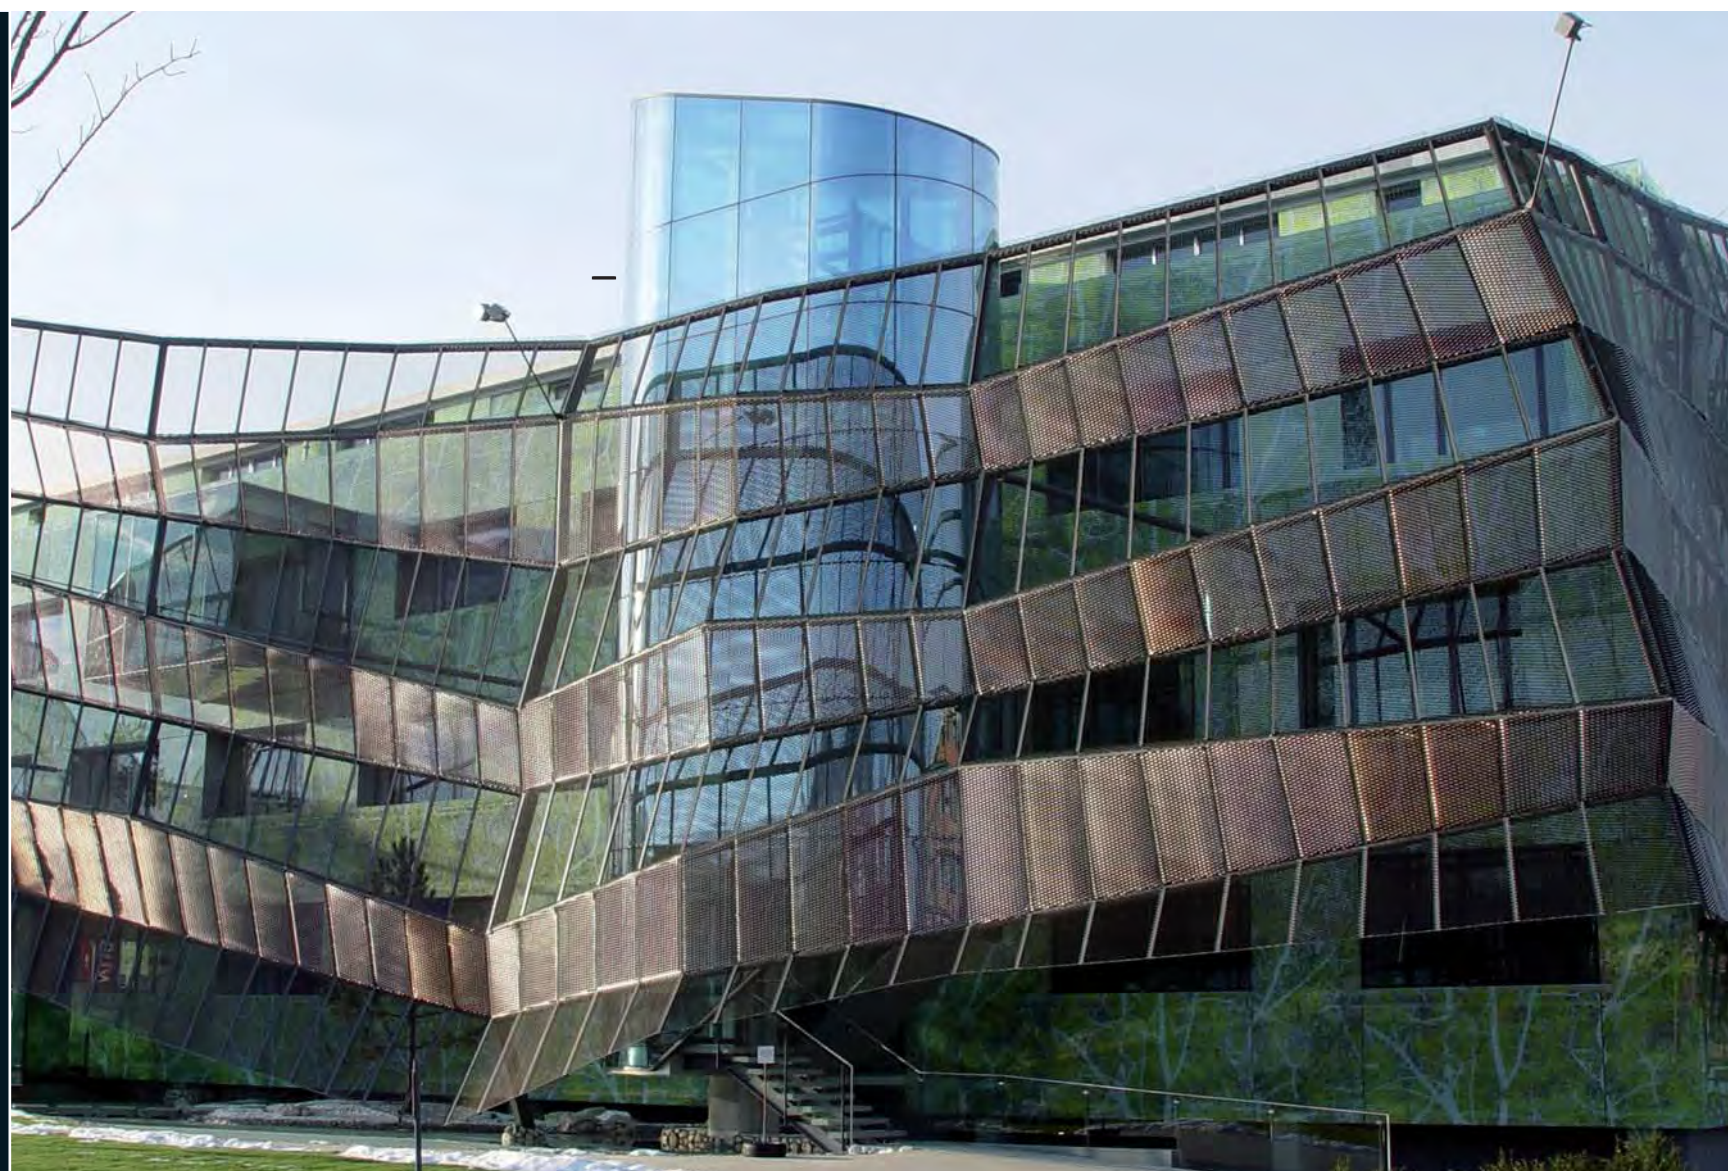

Produkte aus Edelstahl Rostfrei in Farbe ermöglichen individuelle Gestaltung, die verschiedene farbdynamische Szenarien zulassen und so verschiedene Wahrnehmungen und Stimmungen erzeugen.

Edelstahl Rostfrei in Farbe bietet u. a. folgende Vorteile: es verursacht kaum Folgekosten und behält unverändert seine Optik, Form und Funktion. Weiterhin ist dieser edle Werkstoff hundertprozentig recyclingfähig. Er erspart wie kein anderer Werkstoff Reinigungs-, Erneuerungs- oder Sanierungskosten, und das auf sehr lange Sicht.

Sophisticated architecture can be recognised by its classic form and the use of high quality materials. Surfaces of stainless steel which are coloured by using the INOX-SPECTRAL® process have all of the qualities which modern architecture needs: functionality, efficiency and aesthetics.

Coloured surfaces made of stainless steel make individual designs possible which enable dynamic colour scenarios and therefore create various perceptions and moods.

Some advantages offered by coloured stainless steel are as follows: there are hardly any subsequent costs and it maintains the original optic, form and function. The refined material is one hundred percent recyclable. It saves cleaning, replacement and restoration costs over a very long period, like no other material.

Vielfalt in Edelstahl Rostfrei

Seit 30 Jahren beraten wir Architekten, Planer und Bauherren kompetent rund um den Werkstoff Edelstahl Rostfrei.

Unser umfassendes Lager bietet dessinierter, mustergewalzter, geschliffener, glasperlengestrahlter und spiegelpolierter Edelstahlbleche aus Werkstoff 1.4301 (AISI 304) und in den Dicken 0.8 mm, 1.0 mm, 1.5 mm und 2.0 mm. Standardmäßig lagern wir 1.250 x 2.500 mm, weitere Dicken, Werkstoffgüten und Formate sind auf Anfrage lieferbar. Gerne senden wir Ihnen unsere Musterkarte mit Originalmustern zu.

Wir färben in Deutschland Produkte aus nichtrostendem Stahl nach dem INOX-SPECTRAL®-Verfahren bis zu einer Abmessung von 6.000 x 1.200 x 2.000 mm (L x B x H). Neben der Veredelung von Edelstahl-Blechen ist das INOX-SPECTRAL®-Verfahren auch hervorragend für die farbliche Gestaltung anderer Edelstahl-Produkte wie z. B. von Streckmetallen, Drahtgeweben, Profilen, Bauelementen, Kleinteilen usw. geeignet.

Gerne unterstützen wir Sie bei der Lösung Ihrer speziellen Aufgaben durch kompetente Beratung.

Versatility in Stainless Steel

We advice architects, planners and constructors on using the raw material Stainless Steel, for over 30 years.

We have a large stock on hand and offer patterned, textured, grinded, bead blasted and mirror polished stainless steel sheets in quality AISI 304 and in thickness 0.8 mm, 1.0 mm, 1.5 mm and 2.0 mm. We store the standard dimension 1.250x2.500 mm. Other thicknesses, qualities and dimensions are available on request. We are pleased to send you our cards with original samples.

INOX-COLOR colours products in Germany made of stainless steel with dimensions up to 6000 x 1200 x 2000mm (L x W x H) using the INOX-SPECTRAL®-process. In addition to the refinement of steel sheets, the INOX-SPECTRAL®-process is also perfectly suited to the colour design of other premium steel products such as expanded metal, wire mesh, profile, components and small parts etc.

We gladly offer you our support in finding a solution specific to your needs.
